Plus the game took me between 60-90 hours to complete while listening to the voice acting (my Internet was dead on quite a few days I was playing and my Steam settings are confusing so there are a lot of times when I don't get my hours recorded).

Himawari is possibly the best visual novel out there, at least if you like character-focused stories, eccentric but realistic characters who don't just use something like a catch phrase to try to feel eccentric, tons of good surprises, nonsense that turns out to be sensible, plot hints introduced constantly that are surprisingly realized somewhere or another and generational stories involving realistic science fiction (even though some things are introduced as facts when they are clearly wrong).. This is a wonderful VN for those who like histories that bases on mysteries and space.. Two years later, in 2050, Hinata Youichi attends high school as the sole survivor of the crash, his memories lost from the shock caused by the accident.. In my opinion this game is well worth the money and I can't wait to see a translated version of the side history: Himawari Aqua After - The Day the Moon Stood Still.
